

The Complete Patient Transport System

Your confined space and bariatric solution.

The Complete Patient Transport System was designed to provide transporters with the flexibility of Morrison Medical's Soft Stretchers while maintaining spinal immobilization. Ideal for use with larger patients and transporting from or through confined/awkward spaces and rough terrain. The Complete Patient Transport System is x-ray translucent and latex-free. Components include:

Soft Stretcher

Designed for quick cleaning and durability, The Soft Stretcher is latex-free and made from vinyl material with continuous reinforced nylon straps and features no-slip grip rubberized, pre-molded handles. The Soft Stretcher can carry up to 2,000 pounds. Can be used independently as well as with the complete system.

Morrison Medical Select Backboard

The Morrison Medical Select Backboard features a seamless design for quick and easy cleaning and decontamination. Both rigid and lightweight, this backboard weighs only 14½ pounds and measures 71½" x 16" x 1¾", occupying minimal storage space. Molded in pins are optional. Blue, orange, or yellow available.

Load Loks

Load Loks provide added security and patient support while stabilizing the backboard to work cohesively with the Soft Stretcher. Hook and loop closures secure the Load Loks to the backboard while loop-lok ends easily secure to the Soft Stretcher. A set of 4 Load Loks come with each Complete Patient Transport System.
